### Hydraguide™ hydraulic steering valves

The **HGA** and **HGB** series Hydraguide™ steering units are designed for applications such as large agricultural equipment including tractors, combines and other self-propelled, specialized harvesting equipment as well as logging, construction equipment, marine and mining applications.

The **HGF** series is designed for light duty applications such as lawn and garden equipment, small agricultural equipment, small off-highway vehicles and material handling equipment.

## Former Woodward/Barber Colman products

### Dyna Actuators (formerly Barber-Colman)

DYNA Plus actuators can be operated with Woodward controllers to provide engine governing of speed and power for combustion gas, diesel, steam engines and turbines. The actuators can also be used in remote positioning and load control systems.

## Electronic Speed Switches

The switches are adaptive to most speed-related switching functions on diesel and gas engines and other rotating machinery. In addition to generator sets, starter motors, and engines, ESSE switches are also used on diverse equipment such as conveyor belts, bus doors, and magnetic brake retarders.

## Former Woodward/Barber Colman products

### Dyna Mini Generators (formerly Synchro-Start)

The Mini-Gen® Signal Generator develops an AC sine wave that can be used to measure the speed of rotating machinery or engine RPM. Most notably, the Mini-Gen is used on over-the-road vehicles where the input is sent to either a tachometer or a speedometer for determining vehicle speed.
